

THE NEW SWIFT-CHECK ARTEFACT

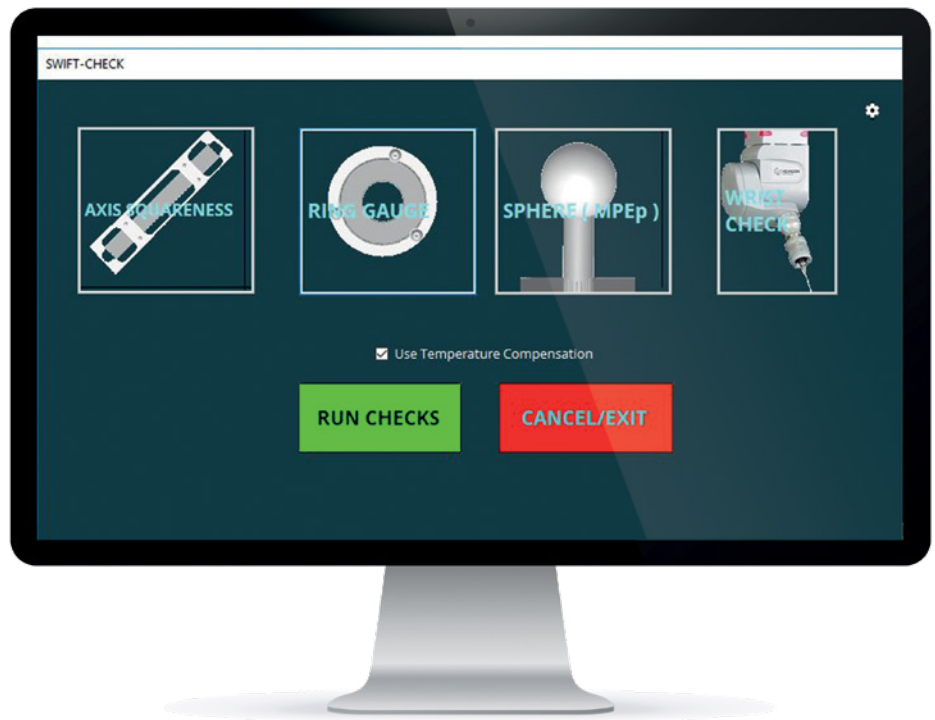

WHY INVEST £3,972 IN A HEXAGON MANUFACTURING INTELLIGENCE SWIFT-CHECK?

4 KEY REASONS WHY

- Be proactive and avoid a potential high cost risk downstream in production or assembly by capturing unseen system measurement inaccuracy errors early.
- Be proactive and be able to demonstrate a consistent metrology confidence in front of your business, customers and auditors.
- Ensure your equipment is optimised between its scheduled ISO Service and Calibration interventions.
- Optimise the ongoing aftercare cost and up time utilisation in your equipment based on its usage and environment.

BEST PRACTICE
ADVICE IS TO
ROUTINELY
CHECK
YOUR CMM'S
PERFORMANCE
BETWEEN
YOUR ANNUAL
SERVICE AND
CALIBRATIONS.

WITH THIS IN MIND HEXAGON MANUFACTURING INTELLIGENCE IS PROUD TO ANNOUNCE THE LAUNCH OF THE NEW SWIFT-CHECK ARTEFACT WITH

- Prewritten measurement routines (PC-DMIS or Quindos)
- Length bar check
- Sphere check
- Ring gauge check and
- Wrist checks

Giving you the assurance you need in your daily measurement and machine accuracy. Measurement routines are designed for use on a bridge style CMM that uses an indexing wrist with either a touch trigger or analogue (scanning) probe.

FOR JUST £3,972 THE RETURNS ON INVESTMENT WILL SPEAK FOR THEMSELVES
